Included Hardware

- J-strap hangers (2)
- Track stops (2)
- T-guide (1)
- T-guide screws (2)
- Carriage bolts (4)
- Washers (6)
- Lock washers (4)
- Hex lag bolts (6)
- Anti-jump blocks (2)
- Anti-jump block screws (4)
- Spacers (6)
- Hex nuts (4)
- An-jump block screws (4)
- Rubber bumper bands (2)
- Felt Pads (2)
- J-strap hangers (2)
- T-guide (1)
- Carriage bolts (4)
- Washers (6)
- An-jump blocks (2)
- Spacers (6)
- Felt Pads (2)

Basic Installation Layouts

Door Prep and Hanger Installation

3" from both sides of the top half of the door, measure down 1 1/4" and 5 1/6" and drill 3/4" pilot holes followed by 1/4 holes.

For large projects, installation templates are available for purchase.

Using the carriage bolts, hex nuts, and lock washers, attach the J-strap hangers to the door as shown in the diagram.

T-guide Installation

Using the T-guide screws, attach the T-guide to the floor by aligning the edge of the guide with the edge of the finished opening as shown above.

Plumb the door before fastening door guide to floor.

Goldberg Brothers warrants the functionality of its barn door hardware sets and tracks with a limited lifetime manufacturer’s warranty for defective parts under normal installation and use. Warranty is subject to repair or replacement of defective components at manufacturer’s discretion and does not include installation costs. This warranty does not apply to the cosmetic condition of any products or components. Goldberg Brothers barn door hardware is sold as a rustic finished hardware and may develop scratches or other signs of wear during manufacturing or normal installation and use. Further, Goldberg Brothers does not warrant against any cosmetic imperfections in the steel parts that may be seen through the finish.

Certain accessories including but not limited to felt strips, rubber bumper bands, and Soft Stop motion buffer mechanisms have finite expected lifetimes due to wear and loss of tension or resilience during normal use over an extended period. Except for manufacturing defects that become apparent within 1 year of purchase, these accessories are not covered under this limited lifetime warranty. Replacement accessories may be purchased as needed from Goldberg Brothers retailers.

Except for stainless steel components, Goldberg Brothers barn door hardware products are not warranted against rust. Some rusting is possible on any raw steel or powder coated steel hardware installed outdoors or anywhere else that it may be exposed to high humidity, rain, snow, or running water.

This warranty does not include loss or defects caused by elements outside the control of Goldberg Brothers, Inc., such as natural disasters, weather, fire, water leakage, abuse, improper installation, or anything else deemed out of the control of Goldberg Brothers, Inc.
Track Centerline

Mark the centerline* of the track on the wall using a level.

*The centerline of the track is represented as the door height (DH) + 1\(\frac{1}{8}\)" above finished floor.

At each of the track connecting points, drill \(\frac{3}{8}\)" pilot holes, followed by \(\frac{3}{16}\)" holes.

FINISHED FLOOR

Using a hex lag bolt, track stop, spacer, and washer, attach one end of the track to the wall using the pre-drilled hole closest to the opening as shown in the diagram.

NOTE: Use the sidewall bracket installation.

Using the remaining hex lag bolts, spacers, and washers, finish attaching the track at the remaining connecting points.

Using the door and hang it from the track.
