**Basic Installation Layouts**

- Standard Hardware Pack installed with no casing, base, or other trim.
- Standard Hardware Pack installed on track trim board that is equal or thicker than casing, base, or other trim.
- Standard hardware with ¾" extension kit installed where casing, base, or other trim is up to ¾" thick.

**IMPORTANT:**

Door must be a minimum of 4 inches taller than the finished opening.

**Hanger Installation**

Hidden roller hangers should be installed flush with the outer edges of the door as shown. Hangers may be installed at a lower height based on desired install scenarios.

**T-guide Installation**

Using the provided screws, attach the hidden roller hangers to the back of the door as shown in the diagram. If necessary, one screw may be left out to accommodate varying door styles.

**IMPORTANT:** Make sure all attached screws are securely fastened.

**Plumb the door before fastening door guide to floor.**

**NOTE:** For bi-parting doors some adjustments may be necessary.
**Optional Accessories**

**Sidewall Guide Bracket**
- 1 each
- Includes 1 bracket, 4 machine screws, 4 nuts and 1 felt pad
- Part #6001SW-*
- 6001SWE-*
- 6001SWEX-*

NOTE: Use the provided T-guide screws for sidewall guide installation.

**Door Guide "U"**
- 1 set
- Includes 2 "U" guides, 2 wood screws and 1 felt pad
- Part #6001U-*

NOTE: Use the provided T-guide screws for U-guide installation.

**Track Connecting Plate**
- 1 each
- Part #6008C-*

**Wall Extension Bolts Set**
- Includes 6 lag bolts and 6 wall spacers
- 6010E-*

**Door Height**
- 3" from the floor

**Track Centerline**

Mark the centerline* of the track on the wall using a level.

Track centerline should sit a minimum of 1½" above finished opening.

*The centerline of the track is represented as the door height (DH) - 3" + ¼".

At each of the track connecting points, drill ¼" pilot holes.

**ADDITIONAL NOTE:** The door must sit a minimum ¼" up from finished floor.

**FINISHED FLOOR**

**NOTE:** The top of the door will sit 3" above the centerline of the chosen track height.

Using a hex lag bolt, track stop, spacer and washer, connect one end of the track to the wall using the pre-drilled hole closest to the opening as shown in the diagram.

Using the remaining hex lag bolts, spacers and washers, finish attaching the track at the remaining connecting points.

Lift the door and hang it from the track.

Using the following table to determine which sidewall guide bracket should be used.

<table>
<thead>
<tr>
<th>Door to Wall Gap</th>
<th>Door Thickness Ranges</th>
</tr>
</thead>
<tbody>
<tr>
<td>½&quot; Gap</td>
<td>1½&quot; - 1¾&quot;</td>
</tr>
<tr>
<td>1&quot; Gap</td>
<td>1½&quot; - 2¼&quot;</td>
</tr>
</tbody>
</table>

NOTE: The end of the track should extend a minimum of ¾" past the door opening as noted above.

Use the provided T-guide screws for U-guide installation.

ADDITIONAL NOTE: The door must sit a minimum ¾" up from finished floor.

Use the SW Guide Bracket

Use the SWE Guide Bracket

Use the SWEX Guide Bracket

NOTE: The top of the door will sit 3" above the centerline of the chosen track height.
