LEEV® SECURE

IN-HOME PACKAGE DELIVERY SYSTEM (retrofit)

WELCOME TO THE FUTURE OF SECURE HOME DELIVERY

Enhance your home with a LEEV® Secure delivery system. This innovative fixture will help protect delivered packages from theft and weather damage. Install your own digital “smart” deadbolt lock (not included) and you can allow couriers to use a temporary passcode to place packages and other items directly inside your house or garage when nobody is home, without giving them risky access to the front door or garage door.

Standard Features

- 16” unit fits between two studs 16” on-center
- 24” unit fits between two studs 24” on-center
- Available in 3 heights: 19” and 25” drop down, and 31” side swing
- Prepared to fit most digital deadbolts with a 2¾” backset and a 2½” hole (5” centerline of bolt to top of inside lock trim)
- 20 gauge steel frame, 22 gauge steel door front panel
- Aluminum back panel and steel shelf
- Durable powder coated exterior finish available in four colors
- Insulated door panel, plus weatherstripping on three sides
- Available with nailing fins for new-build installations or without nailing fins (as shown below) for retrofit installations
- Stops hold the door open while placing a package inside
- Magnetic hold for deadbolt relocking
- Rust-resistant stainless steel pull handle
- 5-year limited warranty (see website for details and disclaimers)

Optional Accessories

- Powder-coated steel interior trim
- Standard street address plate or custom name plate

Add a smart home locking mechanism of your choice. LEEV® Secure panels are compatible with most self-locking digital deadbolt systems. Many will notify the homeowner with a text or email whenever a package is delivered.

Complete the installation by adding your own interior trim and a secure room or receiving box.

This product does not carry a fire rating and should not be installed on a fire-rated wall.

AVAILABLE IN 4 POWDER COAT COLORS	
Black Sand *code BS	White Texture *code WT
